

EARTH DAY ON THE SOUTHEAST COAST

We're living at a time of climate and ecological crisis. The science is clear and people around the world are joining the call for change. For Earth Day 2023 - 22 April - artists and organisations along the Southeast Coast are coming together to connect with nature through creative activity. Take part in a workshop, explore a gallery, discover a Pocket Park – there's lots to do and lots of ways to be inspired.

"The greatest threat to our planet is the belief that someone else will save it."
Robert Swan
